

But you probably knew that.

Nedap TRANSIT 2G card booster

Because to those who are serious about security, the only dual ID capable AVI on the market has been a pretty big deal for more than a decade.

By being able to ID the driver *AND* the vehicle the Nedap TRANSIT readers and tags can prevent a stolen vehicle from being used as a "Trojan Horse" to gain access to your facility. And that's just better security.

Add to that, the ability to boost passive card credentials up to 33ft. and we feel we have something pretty interesting to talk about.

And now, to the booster that makes it all possible, we've added a sleek new design, the ability to boost DESFire, and user replaceable batteries that still can boast a 5 year battery life when using NiCad cells.

So even if you didn't think we were a big deal before, maybe it's time to take another look.

For purchasing info contact 417.339.7368 or just send an email to: info@tuxen.com

Dimensions: 4.6 x 2.8 x 1.1 inches
Operating Temp: -40-+ 185 F
